Department of Computer Science and Engineering

Project Report:
Advanced Object Oriented Programming
Summer - 2016

Project Name:
[Gift Your Beloved]

	ID	Section	Name
	011132132		Iftekhar Hossain

1. Introduction

Gift Your Beloved Is a Fully Web Based. Using This You Can Order a Product and Send These Product to Your Given Address.

2. Objectives

[1. Client Can Easily Choose Product and Buy

2. Give Product as Gift at Any Place Near Whole Bangladesh.]

3. Motivation

[There are many online gift Site. Most are not User friendly but We Want to Build a site which we be User Friendly and Reliable]

4. Project Features

[1. Admin Login

2. Client Login

3. Product Description and Product Choice

4.Cart Out

5.SQL DBContext CRUD

6.Payment System]

5. Platform

[1. Microsoft Visual Studio 12

2. Model View Controller (MVC 4) Framework in ASP.NET]

6. Project Database

[1. SQL DBContext
2. Used This To Connect Database

```
<add name="MovieDBContext"
    connectionString="Data
Source=(LocalDB)\v11.0;AttachDbFilename=|DataDirectory|\Movies.mdf;Integrated
Security=True"
    providerName="System.Data.SqlClient"
/>
```

.]

7. Limitations

[1. We Could Not Fully Implement this Project According to Your Target for Our Programing Limitation.]

8. Screenshots

[Add some screenshots to present your project.]

9. Conclusions

[1. Basic Idea About Object Oriented Programming (OOP)in C#

   => How We Can Use This OOP Logic

    => Where and When Used OOP

2.Model View Controller (MVC) With Entity Framework

   => What IS MVC and Why & When We Will Use MVC in ASP.NET

   => How to Write a Code First Code in MVC

3. Migration in MVC 4 Framework and So On…
